INSTRUCTION BOOKLET

PLEASE CAREFULLY READ THE SEPARATE HEALTH AND SAFETY PRECAUTIONS BOOKLET INCLUDED WITH THIS PRODUCT BEFORE USING YOUR NINTENDO® HARDWARE SYSTEM, GAME PAK OR ACCESSORY. THIS BOOKLET CONTAINS IMPORTANT HEALTH AND SAFETY INFORMATION.

IMPORTANT SAFETY INFORMATION: READ THE FOLLOWING WARNINGS BEFORE YOU OR YOUR CHILD PLAY VIDEO GAMES

⚠ WARNING - Seizures

- Some people (about 1 in 4000) may have seizures or blackouts triggered by light flashes or patterns, such as while watching TV or playing video games, even if they have never had a seizure before.

- Anyone who has had a seizure, loss of awareness, or other symptom linked to an epileptic condition should consult a doctor before playing a video game.

- Parents should watch when their children play video games. Stop playing and consult a doctor if you or your child have any of the following symptoms:

| Convulsions | Eye or muscle twitching | Loss of awareness |
| Altered vision | Involuntary movements | Disorientation |

To reduce the likelihood of a seizure when playing video games:
1. Sit or stand as far from the screen as possible.
2. Play video games on the smallest available television screen.
3. Do not play if you are tired or need sleep.
4. Play in a well-lit room.
5. Take a 10 to 15 minute break every hour.

⚠ WARNING - Repetitive Motion Injuries and Eyestrain

Playing video games can make your muscles, joints, skin or eyes hurt after a few hours. Follow these instructions to avoid problems such as tendinitis, carpal tunnel syndrome, skin irritation or eyestrain:

- Avoid excessive play. It is recommended that parents monitor their children for appropriate play.
- Take a 10 to 15 minute break every hour, even if you don't think you need it.
- If your hands, wrists or arms or eyes become tired or sore while playing, stop and rest them for several hours before playing again.
- If you continue to have sore hands, wrists or arms or eyes during or after play, stop playing and see a doctor.

⚠ WARNING - Battery Leakage

Leakage of battery acid can cause personal injury as well as damage to your Game Boy. If battery leakage occurs, thoroughly wash the affected skin and clothes. Keep battery acid away from your eyes and mouth. Leaking batteries may make popping sounds.

To avoid battery leakage:

- Do not mix used and new batteries (replace all batteries at the same time).
- Do not mix alkaline and carbon zinc batteries.
- Do not mix different brands of batteries.
- Do not use nickel cadmium batteries.
- Do not leave used batteries in the Game Boy. When the batteries are losing their charge, the power light may become dim, the game sounds may become weak, or the display screen may be blank. When this happens, promptly replace all used batteries with new batteries.
- Do not leave batteries in the Game Boy or accessory for long periods of non-use.
- Do not leave the power switch on after the batteries have lost their charge. When you finish using the Game Boy, always slide the power switch OFF.
- Do not recharge the batteries.
- Do not put the batteries in backwards. Make sure that the positive (+) and negative (-) ends are facing in the correct directions. Insert the negative end first. When removing batteries, remove the positive end first.
- Do not dispose of batteries in a fire.

PROLOGUE

Ten years have passed since Goku® and Uub left their friends and families to train in order to hone their skills to perfection. But Goku® soon finds himself helpless against the mystical power of the Dragon Balls and an accidental wish made by the devious Emperor Pilaf®. His desire; that Goku® once again become a child! Not daunted by this small setback, Goku®, together with the new president of Capsule Corporation, Trunks, and his own granddaughter, Pan, blast off into the outer reaches of space in search of the mysterious Blackstar Dragon Balls. But these Dragon Balls have a fatal secret: If not collected within one year, the planet on which the last wish was made will be destroyed. The current target is Mother Earth herself! GAME SCREEN

A. Player Health Meter – Shows the player's health. This decreases whenever you are injured. If it empties completely, your character dies and you should switch to the next team character.

B. Player Energy Meter – Shows your energy level. This decreases when you perform certain attacks, such as ki blasts or special attacks.

C. Team Character Meters – Show the health and energy of your team characters.

D. Multiplayer Character Meters – Only appear during a multiplayer game. They display the health and energy of the other player's characters.

E. Score – Your accumulated score for the level.

F. Combo Hit Number – Displays the amount of combo hits you have received. You can continue to increase the length of the combo so long as the hit number appears.

G. Dragon Radar – Shows you where your character should go.

H. Enemy Health Meter – Shows the health of the enemy that you last attacked and the name of the enemy. As you fight the enemy, his health meter is lowered and the meter changes color to show your progress. The toughest enemies start with a white bar and go down from there to purple, blue, green, yellow, orange and red.

I. Boss Health Meter – Only appears when you are fighting a boss. It shows the boss's current health. As you fight the boss, his health meter is lowered and the meter changes color to show your progress. The toughest boss starts with a white bar and goes down from there to purple, blue, green, yellow, orange and red.

COMBAT

Melee

Press the **B Button** to perform a melee attack. Press the **B Button** in rapid succession to execute a melee series, as long as you are hitting an enemy. Each character's base series consists of three hits, with the last one being the "ender" that knocks the enemy down. For additional moves in this series that are inserted before the ender, press the **B Button** plus a **+Control Pad** direction.

Heavy Melee

Hold the **+Control Pad** ◄ or ► and press the **B Button** at the same time to perform a Heavy Melee attack. This attack does twice as much damage as a normal punch, and knocks over enemies that are hit by it. The drawback to this attack is that there is a delay after the attack is performed where you are vulnerable, regardless of whether you hit the enemy or not.

Energy Attack

Press the **R Button** to fire an Energy Attack. Press and hold the **R Button** to charge it up and fire a larger Energy Attack. To walk while charging, continue to hold the **R Button** while pressing the **+Control Pad** direction. There are three different levels of Energy Attacks, each one more power-ful than the last.

Special Energy Attack

Press the **R Button** and the **B Button** at the same time to perform a Special Energy Attack. You must have a full energy bar to use this attack. This drains the character's entire energy bar, but it does far more damage than a normal energy attack.

Charge

To recharge your energy, press and hold the **L Button**. If you are low on health and your energy is flashing, when you charge your energy you automatically do a Charge Blast that pushes back nearby enemies and gives you time to recharge your energy.

Switch Characters

In Single Player Mode, press **SELECT** to make a selection bracket appear around the first team character. Quickly press **SELECT** again to move it to the second team character. You can toggle between the two team characters as often as you like. You must wait after switching characters before you can return to playing as the original character.

POWERUPS

Powerups are dropped by the destructibles in the game. To pick up a powerup, walk over it.

Stat Powerups

These are powerups that increase the characters' stats. There are four types:

  Red – Increases the Health stat

  Yellow – Increases the Strength stat

  Green – Increases the Power stat

In addition, there are large and small versions of each of these types. The small versions are worth one point, and the large versions are worth 10 points. The player must collect many of a certain type to increase that stat by one point. Each time the player collects 10 of the small stat gems, or one large one, the respective stat increases by one.

Recharge Powerups

Health Recharge:

Small (Soda, Candy Bar, Apple) – Refills 10% of the health bar

Medium (Burger, Noodle Bowl, Pizza) – Refills 50% of the health bar

Large (Turkey, Sub Sandwich, Watermelon) – Refills 100% of the health bar

Senzu Bean: The Senzu Beans are very rare. If one of your team characters is dead, the

Senzu Bean brings him back to life with 25% health and 0% energy. If both of your team characters are dead, the first one that died is brought back to life. If none of your team characters are dead, your character is restored with 100% health and 100% energy.

Timed Powerups: Timed Powerups do not transfer from character to character if you switch characters.

Invincibility: The current character takes no damage for 20 seconds. Your character will flicker during the duration of invincibility.

Kaioken: The character's strength, power and speed stats are increased by 5 for 20 seconds.

Infinite Energy: Your character's energy bar isn't drained at all when he uses energy attacks for 20 seconds. During this time, the Energy meter turns yellow, and doesn't drain. After the time has passed, the meter returns to green.

Super Speed: The current player gets a speed boost equivalent to an added stat point. This effect lasts 20 seconds.

STATS

These stats can be improved by collecting powerups from enemies.

Health Stat

Shows how much damage the character can take before he or she dies.

Strength Stat

Determines how much damage is done to an enemy with a melee attack.

Power Stat

Shows how much damage energy attacks do.

SECRETS

You can spend the Zenie you collect over the course of playing the various game modes on Secrets, which open up new portions of the game. Select Secrets at the Main Menu to list Secrets the costs to unlock them. Many Secrets are hidden until they are unlocked.
